

Detail Design calculation , FEA Thermal Stress Analysis and Detail fabrication Drawing for Vapor Separator (Oslo Type)

THE CLIENT

A India-based client offering an array of customized solutions to chemical ,pharmaceutical, petrochemical, oil refinery, power generation and waste treatment.

THE BUSINESS NEED

Our client was seeking engineering design assistance for a Vapor Separator (ASME U-stamp) design. Client wanted Thermal Stress simulation on vapor separator along with Lifting and Operating Support Lug Stress verification.

NEOCENT SOLUTION
&
DELIVERABLE

Detail Engineering : Mechanical detail design on Vapor separator, Lifting Lug Mechanical design calculation, Support Lug and Foundation Anchor design and calculation.

CAD Detailing : G.A. Drawing , Details fabrication drawing ,3D Vessel Modeling, Lifting and Erection Drawing.

Analysis : Vessel thermal stress analysis, Lifting Simulation to check buckling(Code: ASME Sec VIII Div 2).

FEA Stress Analysis post processing under ASME Div 2.

Neocent Engineering Services is a multi-discipline engineering services company. Established in 2015, we offer high-quality engineering support solutions to global EPC organizations across some of the industries listed: Automotive, Aerospace, Turbo machinery, Heavy engineering, HVAC, Oil & Gas, Material handling and Process industry.

Neocent provides detailed engineering services to EPC, EPCM, OEM, and PMC as long-term turnkey projects. Our EPCM services include Project Management, Feasibility Studies, Conceptual & Basic Engineering, Detailed Design, Procurement, Construction Management, Commissioning & Start-up, and Operations & Maintenance.

Neocent Engineering's service offering, include;

- Engineering and Stress Analysis Services
- Details Engineering
- 3D Modelling and 2D CAD Services
- Statutory Approvals

ASME BPVC

Pressure Vessel Consulting Services

Neocent Engineering specializes in "design-by-analysis" pressure vessel work following ASME Section VIII, Div. 2 (BPVC).

We also offer the ability to perform standard ASME Section VIII, Division 1 Rules for the Construction of Pressure Vessels.

Our FEA BPVC consultants have completed a broad range of analysis work on hundreds of pressure vessels. Within this body of work, we have applied the following codes

- ASME BPVC Section VIII, Division 2 (Alternative Rules or "Design-by-Analysis")
- ASME BPVC Section VIII, Division 1 (Rules for the Construction of Pressure Vessels)
- ASME Pressure Vessels for Human Occupancy (PVHO)
- ASCE 4-98 and ASCE 7-02

These FEA pressure vessel consulting projects cover a wide variety of analyses, from differential thermal-stress analysis of heat exchangers utilizing mixed materials, to stress and fatigue analysis of large-diameter vessels, to analyses of vessels with complex internal structures subjected to sloshing, seismic and added-mass effects or lifting and transportation analyses and transient thermal-fatigue of thick-walled tanks.

In brief, clients come to us when they need high-quality work executed and documented to withstand the most rigorous reviews.
